# INTRODUCTION: WHAT IS A COURSE?

A module is a **teaching unit** and can consist of **several courses** (lectures, seminars, excursions, practical exercises, tutorials...).

#### Example:

(4902-440) Economics and Environmental Policy consists of 4 courses:

- 4902-441 Basic Microeconomics (1st half of the semester)
- 4902-442 Environmental Policy (2nd half of the semester)
- 4902-443 Exercises to Basic Microeconomics (1st half of the semester)
- 4902-444 Exercises to Environmental Policy (2nd half of the semester)

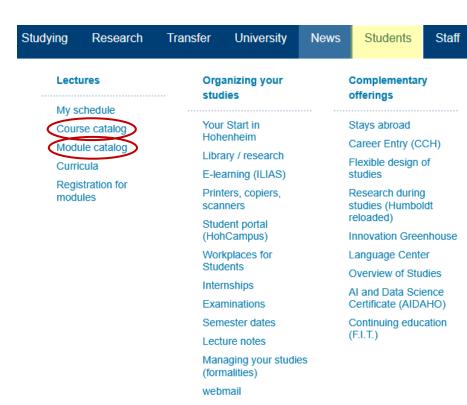

**Module** = teaching unit

Courses = sub-units of modules

# INTRODUCTION: DIFFERENCE BETWEEN "MODULE CATALOG" AND "COURSE CATALOG"

- ➤ The **Module Catalog** shows the structure of the study programs, it lists the compulsory, semi-elective and elective modules and indicates in which semester they are supposed to be studied. Here you will not find information about the teaching in the current semester!
- ➤ The **Course Catalog** shows the courses offered in the respective semester, including information about the time and the venue of lectures, the teaching mode (online / in presence on campus) and the link to the ILIAS course.
- Both catalogs are publicly accessible without being enrolled!

# INTRODUCTION: MODULE CODE - MIRRORS THE FACULTY'S STRUCTURE

# (4902-440) Economics and Environmental Policy

Each module and each course is assigned a specific code.

The first four digits represent the respective institute and the department (i.e. of the responsible person / course instructor).

The next three digits correlate to the type of module, as well as the courses.

- $\rightarrow$  4902 -440 = institute number (310 490 in the Faculty of Agriculture)
- > 4902 -440 = department within the institute (1 9 possible)
- ➤ 4902 -440 = module designation:
  - -010 200 basic modules for Bachelor's students
  - -210 400 specialization study modules for Bachelor's students
  - -410 800 modules for Master's students
  - -810 900 modules for PhD students
- > 0000 -011 = course 1 of a module (1 9 courses possible)

A picture is often helpful, if you want to be recognized by teachers or classmates, but it is not mandatory.

# **IMPORTANT SETTINGS**

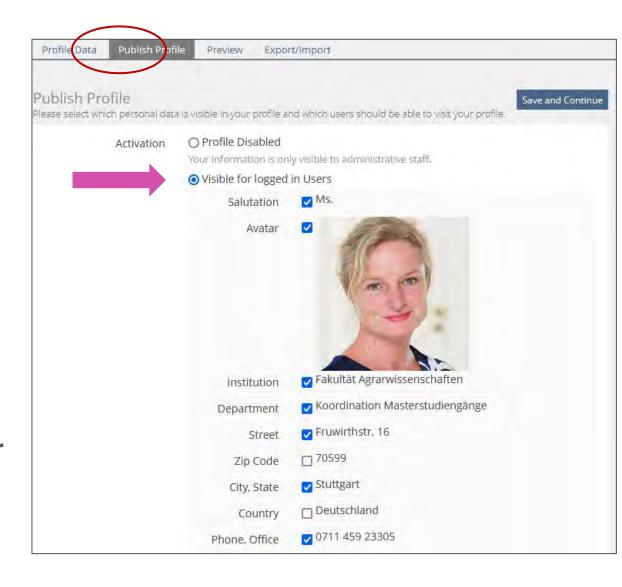

**Publish Profile:** 

If you want your name, picture and other selected data to be visible for lecturers and classmates you must select "Visible for logged in Users" and then select what information should be visible besides your name.

If you do not activate the visibility of your profile not even your name will be published. This is often a problem for your teachers if they want to communicate with you.

It is therefore strongly recommended to make your profile visible.

Don't forget to save your selection!
